

Ten Plot Design Considerations

- 1) Ensure treatments are valid comparisons
- 2) Keep treatments simple and to a minimum
- 3) Replicate
- 4) Use randomized complete block designs
- 5) Account for field variation
- 6) Consider farmer ease
- 7) Yield monitors versus weigh wagons
- 8) Collect more than just yield data
- 9) Don't bulk the data together
- 10) Have fun!
